PROFESSIONAL SUMMARY

- Full-Stack Developer and Software Engineer with hands-on experience building and improving web applications, REST APIs and business-oriented software with Vue 3, TypeScript, Laravel/PHP and MySQL.
- Combines development, technical QA and root-cause debugging with requirements and workflow analysis to turn business needs into maintainable technical solutions.
- Uses AI-assisted and agentic development daily while owning design, code review, testing and delivery. Fast learner in new codebases and teams.

SKILLS

Frontend: Vue 3, TypeScript, JavaScript, Pinia, React, Tailwind CSS, HTML, CSS
Backend: Laravel, PHP, REST APIs, MySQL, Socket.IO, JWT Authentication, API Integration, Payment Integrations
Testing & QA: Regression Testing, API Validation, End-to-End Validation, Root-Cause Debugging, Vitest, Postman
Tools & Other: Git, Docker, Vite, Phaser, AI Integration, AI-Assisted Development (Claude Code)

PROFESSIONAL EXPERIENCE

Software Developer & Technical QA | Confidential Software Product | *Freelance, part-time* | *Jun 2025 - Present*

Client and product details withheld due to confidentiality. Tech: Vue 3, TypeScript, REST APIs, Socket.IO, Git, payment integrations

- Investigated, reproduced and resolved 200+ issues across frontend behaviour, API integrations and end-to-end application flows.
- Performed technical QA, regression testing, API validation, root-cause debugging and end-to-end validation.
- Contributed to real-time chat and API-connected flows, including authentication, roles/permissions and payment-provider integrations.
- Analysed product and operational problems, proposed technical/UX improvements and turned ambiguous needs into implementable tasks.

Full-Stack Developer Intern | Comunica.dk Translations S.L. | *Mar 2025 - Jun 2025*

Tech: Full-Stack development, AI integration, CRM integration, deployment/DevOps

- Analysed an internal business workflow, researched technical alternatives and presented a solution proposal before implementation.
- Designed and developed an AI-powered CRM plugin that analyses employee-client email threads into summaries and insights.
- Implemented response drafting assistance, automatic text correction and translation for email drafts.

Freelance Web Developer | Asociación Respira | *Project-based*

Tech: PHP, MySQL, HTML, CSS, Authentication

- Developed a PHP/MySQL internal management system for registering, consulting and managing social intervention records.
- Implemented authentication, access control and database-driven workflows for sensitive operational information.
- Validated core forms, permissions and data flows before delivery.

SELECTED PROJECTS

Nusa: Warung Sort | *Web puzzle game, published* | kokeskill.itch.io/nusa-warung-sort

Tech: Phaser 4, Vite, Vitest, agentic AI development, AI-generated assets

- Designed, built and published a complete web puzzle game as a solo developer, owning game design, architecture, implementation, testing and release.
- Directed agentic AI coding tools and AI asset generation, reviewing, debugging and validating all generated code and content.
- Set up automated tests with Vitest and a Vite build pipeline, and prepared production builds for web game portals.

Nusa Creator Studio | *Independent AI-powered SaaS (under development)*

Tech: Vue 3, TypeScript, Laravel, Pinia, Tailwind CSS, REST APIs, AI provider architecture

- Building an independent AI-powered SaaS product for social-commerce campaigns, scripts, captions, analysis and content automation.
- Designed project and generation workflows, history, credits, plan-based feature gating, decoupled AI providers and automated API/frontend tests.

VueShop Admin | *E-commerce administration dashboard*

Tech: Vue 3, TypeScript, Laravel, MySQL, JWT Authentication, REST APIs

- Built a full-stack administration dashboard for products, orders and users with JWT-protected routes and CRUD workflows.
- Integrated a Vue frontend with a Laravel REST API and validated authentication, protected flows and API responses.

EDUCATION

- Higher Vocational Degree in Web Application Development (DAW), I.E.S. Fuengirola No.1 | 2023-2025
- Technology Baccalaureate, I.E.S. Las Lagunas | 2007-2009
